4993 O'Hear Ave • North Charleston, SC 29405 • thomason84@mc.com • (843) 610-1383

Web Developer specializing in front end languages, SEO, and process improvement. A former Air Force E-5 that works diligently to constantly deliver an above average quality of work in less time than most colleagues

Knowledge/Skills/Abilities

- Proficient in HTML, CSS, Bootstrap, jQuery, JavaScript, and ColdFusion
- Working knowledge of SQL, Python3, React, and Node

Work Experience

VetFriends – Daniel Island, SC

06/18 to Present

Web Developer

- Write reusable and powerful JavaScript, ColdFusion, CSS, jQuery and HTML for the VetFriend.com website
- Used Google Analytics and Google Search Console to increase page rank on search engines. This increased average page rank from over 15 to less than 9 resulting in an overall revenue increase of roughly 30%.
- Used ColdFusion include file types to replace over 60 pages and hundreds of sections of code. These brought troubleshooting time down by 90% and contributed to overall process improvement.
- Created a better UX/UI experience overall by implementing logical processes with client side validation. This reduced duplicate submissions by 95% which resulted in savings due to decreased chargeback cost.
- Carefully scrutinize and A/B test all major changes to ensure performance and/or revenue increases. The average revenue increase for each change is roughly 10%
- Increased website speed by 80% by replacing .png graphics with .svg and reformatting .jpg images
- Updated images and forms to include accessibility attributes that are used for screen readers, the accessibility score rose to over 85% from less than 30%
- Implemented Jira company wide and trained all necessary employees on the use and features of Jira

Benefitfocus – Daniel Island, SC

08/17 to 6/18
